Announcing 3D PDF Converter version 4.2 and more

Dear tetra4D Customers,

We're writing to give you a quick update about a lot of exciting new events at Tetra4D. As some of you know, Tech Soft 3D acquired Tetra4D last December. This investment brought the development and distribution of 3D PDF Converter in-house, allowing us to speed up and improve the development and support of our entire product line. The fruits of our labor have begun to appear over the past few months:

- We've released new versions of 3D PDF Converter for Adobe® Acrobat® Pro and Reviewer. Version 4.2.2 includes 499 enhancements, improvements, and bug fixes since 3.6.5.

- We've also released version 4.0 of our 3D PDF CAD Plug-ins for Autodesk. The latest versions for Inventor, AutoCAD, Revit, Navisworks, 3dsMax, and Maya offer many fixes as well as 2015 version support.

- We've updated our 3D PDF Enrichment products (Animate, Publish, and Compare) as well. See our Version 1.7.1.8 release notes.

Licensing Note: If you're already using a 4.x version of 3D PDF Converter, you can download 4.2.2 and install it without needing a new software license. If you have a version prior to 4.0, you will need to request a new license key. Customers with active Converter maintenance contracts are eligible for free license upgrades.

Coming soon

In the next few months we will be rolling out a new software licensing mechanism for 3D PDF Converter, allowing you to more easily activate and move your licenses around. Also, you will notice an entirely new look and feel for our website. We're renovating a bit to make it easier for you to find support, training, and product information more quickly and easily. We're also revamping our shopping cart to make for a much easier shopping experience.

To download updates for your existing software, go to our Support Page and click on Customer Portal Login. To download a new trial, you can click Try it Now on any of our product pages.

Thanks for being a Tetra4D customer. We look forward to continuing to serve your 3D PDF needs!
